

STRING PULL ART

This very creative art project produces some stunning effects! Using Five Star Indian Inks gives a vibrant effect and this technique of using PVA glue as a medium also creates different effects. This project can be a little messy, making it even more fun!

Learning Objectives:

Imagination, creative processes, tactile learning, hand eye coordination, colour combination.

Level

Beginner

Expert

You will need:

- Five Star Indian Ink - various colours
- Five Star Canvas or Canvas Panel
- Roll of string
- Five Star Paint Tray Base
- Five Star Art Extra 3 pc Foam Brush Set
- Five Star PVA Glue General Purpose
- Gloves (optional)

Lets create:

Step 1:

Cover your work area with newspaper before you start.

Step 2:

Cut 6-8 lengths of string into approximately 30-40 cm long and set aside.

Step 3:

Pour a little of each of the Five Star Indian Ink colours into the Paint Tray Base, keeping the colours separate.

Step 4:

Pour some Five Star PVA Glue General Purpose directly onto your canvas and use the foam brush to spread a thick coat over the entire canvas surface. Don't let the glue dry out.

Step 5:

Dip a piece of string into your first colour leaving one end dry and free of colour. Make sure the string gets soaked but not too much. Use a separate piece of string for each colour.

Step 6:

Take the first piece of string and lay it onto canvas in an "S" shape leaving the dry end over the edge of the canvas. You can also try zig-zag or loop shapes.

Step 7:

Gently and slowly, without lifting, pull the string down from the dry end towards you and watch the colour transfer in amazing patterns.

Step 8:

Repeat steps 5-7 above using different colours to form your picture. Allow to try overnight. Experiment to get different patterns, shapes & effects!

Add extra detail using an artists brush or marker pen.
