

COLOURFUL PLANETS

This artwork uses the different mediums of Creative Paint with a high build, 3-D finish, along with Liquid Dye. Simply dilute the colour intensity to the tone required.

CP01

Learning Objectives:

Colour combination, hand eye coordination, fine motor skills, creative process.

You will need:

- Five Star Creative Paint Black
- Five Star Liquid Dyes various colours
- Five Star Painting Tray or containers
- Paper or Card
- Pencil
- Paint Brushes
- Star Tempera Glitter Gold

Use other Creative Paint colours to flood the inside areas of the dry black outlines as another creative idea

Lets Create:

Step 1:

Use the pencil to draw the outline of your planets onto the paper or card.

Step 2:

Take the Creative Paint black and following the pencil lines, gently squeeze to create the outlines of each planet.

Leave to dry – approximately 2 hours (or overnight is best).

Step 3:

Place several drops of different colours of Liquid Dye into the painting tray and add water to dilute to the desired colour.

Step 4:

Paint the inside of each planet with a different colour – blend some to get different effects. The raised surface of the dry Creative Paint will make it easy to paint inside the lines.

Step 5:

Using the darker colours, paint the

night sky outside the planets, again blending to give a nice effect.

Step 6:

Add some stars using the gold Glitter Paint – dab a spot and by using the opposite end of the paint brush, drag the glitter paint out in four directions to give a star effect.

Step 7:

Leave to dry.
