

WIZARD'S WAND

This is a creative and fun project, great for young adults olden enough to use a hot glue gun or as a project for parents to do together with younger children. Using metallic and glitter paints gives each wand a real sparkle!

Learning Objectives:

Imagination, hand eye coordination, creative process,

Level

Beginner

Expert

You will need:

- Wooden chopstick or piece of dowel
- Five Star NZACRYL Acrylic Metallic Colours
- Five Star Tempera Glitter Colours
- Five Star Artists Brushes
- Hot Glue Gun and Glue Sticks
- Marble or Gem
- Five Star PVA General Purpose Glue

Lets create:

Step 1:

Paint a base colour on your chopstick using your favourite Five Star Acrylic Paint metallic colour. Allow to dry.

Step 2:

With a hot glue gun, glue your marble or gem to the top of the thicker end of the chopstick. Hold upright until set.

Step 3:

With the hot glue gun, carefully apply glue to your chopstick while rotating the chopstick in your hand. Be creative adding bumps and twist effects. It is best to hold the chopstick while drying at this stage, it won't take too long.

Step 4:

Once the glue is set, paint your glue covered chopstick with the same colour as your base. Or you may choose a contrasting colour.

Step 5:

When this is dry, add highlights in contrasting colour to the raised areas/bumpy parts.

Step 6:

Once the paint is completely dry, finish with a coat of Five Star PVA General Purpose Glue as a sealing coat. This will look white when wet but will dry clear.

Step 7:

Now you are ready to cast some spells!

CAUTION

Take care when using the hot glue gun - do not touch the glue until it has set

NZACRYL

NZACRYL Acrylic is a versatile, lightfast, water resistant art and craft paint. It has a smooth, buttery consistency with excellent mixing qualities and clarity of colour. NZACRYL is fast drying and non toxic making it ideal for craft work, student artwork and home activities. The range of metallic colours gives an extra brilliance to any art project.

NZ01

Create METALLIC MOON & STARS

Level
Beginner Expert

You will need:

- Five Star NZACRYL Metallic Paint
- Five Star School Cellulose Paste
- Five Star Stubbie Brush R2
- Cardboard
- Scissors
- Newspaper
- Paper clip
- Fishing line (optional, for hanging)

Alternatively, you could use tissue paper instead of newspaper to get a different sort of textured effect.

Method - Stars:

Step 1: Mix up the School Cellulose Paste according to the instructions on the label & set aside.

Step 2: Draw (or trace) a star onto the cardboard & cut it out.

Step 3: Brush glue paste over both sides of the star.

Step 4: Loosely lay ripped up pieces of newspaper over the star ensuring you keep its star shape.

Step 5: Insert a small paper clip, with the tip bent out slightly onto the tip of the star

& layer over more newspaper to hold it in place. Approx 4 layers will give the texture shown here. Set aside to dry.

Step 6: Paint the entire star with NZACRYL Metallic Gold & set aside to dry. Apply 2 coats.

Step 7: To hang your star, thread fishing line through the paper clip & attach to a hanger.

Method - Moon:

Step 1: Mix up the School Cellulose Paste according to label instructions & set aside.

Step 2: Draw (or trace) a half moon with a mouth & nose shape onto cardboard & cut it out.

Step 3: Brush the glue paste over 1 side of the moon & scrunch up some newspaper & glue to the cardboard to give it some initial shape. Then, brush more glue paste over & loosely lay ripped up pieces of newspaper over the moon.

Step 4: Repeat "Step 3" for the other side of your moon.

Step 5: Continue to layer glue paste & newspaper, making some pieces go right around the moon overlapping both sides

while moulding some facial features with the wet newspaper.

Step 6: After several layers, place a small paper clip, with the tip bent out slightly close to the top of the moon & layer over more newspaper to hold in place. Set aside to dry.

Step 7: Using NZACRYL Metallic Silver, paint the entire moon & set aside to dry. Apply 2 coats.

Step 8: To hang your star, thread fishing line through the paper clip & attach to a hanger.
