

STAR TEMPERA

This is a premium washable paint ideal for beginners and younger children. It is non toxic, water soluble and easy to clean up. Star Tempera Poster Paint comes in a range of vibrant colours including standards, fluorescents, glitters and metallics. The range of glitter and metallic colours give an extra brilliance to any art project. Ideal for posters, models and any art project.

ST01

Create a METALLIC ZEBRA

You will need:

- Five Star Star Tempera Metallic Paints
- Five Star Star Tempera Black Paint
- Five Star PVA Glue School Grade
- Five Star Glue Spreaders
- Five Star Painting Tray
- 1 sheet of A4 white card 200 g
- 1 sheet of A4 white card 400 g (or more)
- Scissors
- Pencil
- Newspaper

Alternatively this artwork can be created using Star Tempera Glitter Colours.

Method:

Step 1:

Place newspaper down to protect any surfaces.

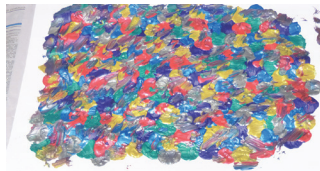

Step 2:

Pour each of the 6 Star Tempera Metallic colours into the painting tray and place a brush in each.

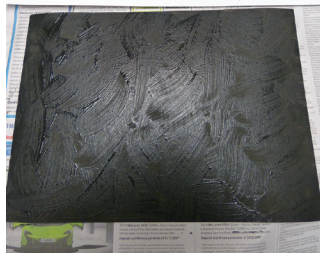

Step 3:

Using the 200 g piece of white card, start with 1 colour and "blob" dots on the page randomly, then select another colour and "blob" dots randomly. Continue in this manner until the entire page is filled and no white is showing. Then you can use a brush to gently brush across different colours so the colours start to merge slightly, if you like that effect. Set aside to dry.

Step 4:

Pour out a little of the Star Tempera Black in the clean paint tray and paint the heavier weight sheet of card. Finish using a crisscross pattern with the brush to give an "effect" pattern. Set aside to dry.

Step 5:

Turn over the painted metallic sheet and using a pencil draw

the outlines of the stripes you need to cut. Once you are happy with this start cutting the stripes to place onto the black background.

Step 6:

Lay all the stripes out in place. Pour some glue into the clean paint tray and using a glue spreader to glue each piece into place ensuring a gap is left between each of the metallic stripes. Set aside to dry.

Hint: Using this method, choose an easier design or something more complex.
