## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### Exposure Stds

Ingredient	Reference	TWA		STEL	
		ppm	mg/m3	ppm	mg/m3

### Engineering Controls

None required when handling small quantities. Bare skin is cleaned with this material. Application of hand cream / barrier cream after use is recommended.

OTHERWISE: Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection. The basic types of engineering controls are: Process controls which involve changing the way a job activity or process is done to reduce the risk. Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.

### PPE

**Eye/Face** Wear splash-proof goggles.  
**Hands** Wear PVC or rubber gloves.  
**Body** Wear coveralls. When using large quantities or where heavy contamination is likely, wear rubber boots and a PVC apron.  
**Respiratory** Where an inhalation risk exists, wear a Full-face Type B (Inorganic and Acid gas) respirator
