

CARBINE PADLOCKS

Carbine is the next generation in locking. Carbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been the way'. Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years.

The Carbine Padlocks are a next generation product. Here's why: Carbine padlocks feature a unique patented cam design allowing the user to change padlock function in seconds. The padlocks have been designed by locksmiths using fewer parts and with a smoother action. Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

ALUMINIUM PADLOCKS

Dual Cylinder

Revolutionary designed padlock to enable the use of two separate keys or keying systems. The Carbine Dual Entry padlock solves a recurring problem of having one padlock on a chain or on a hasp & staple with two different organisations needing access.

Features:

- 64.5mm diameter body (32.25mm radius) + 35mm thickness
- Standard function as key retained mode only
- 7.93mm double ball locking
- 8mm molybdenum alloy shackle

Dual Cylinder Dual Shackle

The Carbine Dual Shackle padlock eliminates the need for any welding to the padlock, chain and gate. The uniquely designed padlock allows shared access through two individual shackles, operated by two individual keys or key systems, each operating their own shackle, thus providing their own access and ultimately creating a shared access solution.

Features:

- 64.5mm diameter body (32.25mm radius) + 52mm width
- Dual system and reversible cam - allows key retention or non key retention
- Accepts 6 pin R48 cylinders LKW5 (C4) keyway
- Accepts most in line restricted keyways (to Lockwood barrel specifications)

- Shackles duplex nickel and chrome plated hardened to 60HRC
- Accepts 2 x 6 pin Carbine C530 cylinders
- Can be supplied with or without cylinders
- 6061 aluminium anodised body

MODEL DETAILS

Product Code	Model	Keying	Shackle
CDEP-1NC	Dual cylinder	No cylinder	30
CDEP-1KD	Dual cylinder	With cylinder	30
CDSP-1NC	Dual cylinder, Dual Shackle	No cylinder	30
CDSP-1KD	Dual cylinder, Dual Shackle	With cylinder	30

SHACKLES

Product Code	Description	Clearance
CDX45-SA1	Molybdenum Shackle 8mm diameter	30mm
CDX45-SA2	Molybdenum Shackle 8mm diameter	50mm
CDX45-SA3	Molybdenum Shackle 8mm diameter	75mm
