

# combination

## CP60 Recodable combination range

- 5 wheels with 100,000 possible combinations, making the lock very difficult to pick
- Fully recodable
- $\frac{5}{16}$ " diameter hardened steel shackle
- Die cast alloy body with dual compound cover
- Spaced wheels for ease of use, push button spring opening, double locking mechanism.
- Dual compound protective cover for high corrosion resistance and excellent weather protection

### Recommended for

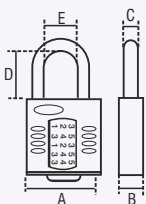

Gates, vans, large sheds, garages and commercial buildings.

patented

European Patent No 07251150.4  
USA Patent No 11/687761
