

DYNAMIC TRIM CONTROL SYSTEM

SERIES S **PRO**

INSTALLATION GUIDE

ZIPWAKE

CHOOSE COMFORT. ENJOY PERFORMANCE.

TOOLS

Drill bits
Ø 2.5 mm (3/32")
Ø 3 mm (1/8")
Ø 3.5 mm (9/64")
Ø 4 mm (5/32")
Ø 5 mm (13/64")

Hole saw
Ø 19 mm (3/4")
Ø 76 mm (3")

Screw bits
T10
T20
T25
T30

Power drill

Sealant

Flat screwdriver

Bits screwdriver

Wrench

13 mm (33/64")
27 mm (1 1/16")

Utility knife

Hacksaw

Antifouling

THE KIT BOX CONTAINS

INTERCEPTOR

2 x Interceptors
with Cable 3 m & Cable Cover

DISTRIBUTION UNIT

1 x Distribution Unit
with Power Cable 4 m

CONTROL PANEL

1 x Control Panel
with Standard Cable 7 m

- + Operator's Manual
- + Warranty Card
- + Installation Guide
- + Drill Templates
- + Mounting Screws
- + Operator's Quick Guide
- + Startup Checklist

SYSTEM OVERVIEW

INTERCEPTOR

1 MOUNTING OPTIONS

THRU-HULL CABLE FITTINGS

Depending on preference, the Interceptors can be mounted with thru-hull cable fittings above the waterline (A) or below, concealed behind the Interceptors (B).

ALLOWED SPRAY RAIL OVERLAP

INTERCEPTOR

PROPELLER CLEARANCE

If the boat has an outboard engine or sterndrive, the Interceptors must be mounted with clearance to the propeller(s).

CONVEX BOTTOM CURVATURE

CONCAVE BOTTOM CURVATURE

OPTIONAL

V-shaped models for center mount

NOTE! Same tolerances and clearances as straight/chine interceptors.

INTERCEPTOR

2 PREPARE THE TRANSOM

ENSURE A FLAT SURFACE FOR EACH INTERCEPTOR

The transom must be relatively flat where the Interceptors are mounted to ensure that they work properly.

DRILLING TEMPLATE

Start mounting the Interceptors as far outward as possible, although well inside the transom. Continue inwards when installing multiple Interceptors.

Only if a concealed thru-hull fitting will be used

Option 1:

1. Pilot hole Ø 3 mm (1/8")
2. Hole saw Ø 19 mm (3/4")

Option 2 (M18 x 2.5):

1. Pilot hole Ø 3 mm (1/8")
2. Hole saw Ø 16 mm (5/8")
3. Tap M18 x 2.5

INTERCEPTOR

3 INSTALL THE BACK PLATES

A. FOR THRU-HULL FITTINGS ABOVE THE WATERLINE
GO STRAIGHT TO STEP B.

B. MOUNT THE BACK PLATE

INTERCEPTOR

4A INSTALL THRU-HULL FITTINGS ABOVE THE WATERLINE

INTERCEPTOR

7

Drill holes for the cable cover
Use the cover as a drill template
Ø 3.5 mm (9/64")

Apply sealant

Drill holes (x3) for the cover
Use the cover as a drill template
Ø 5 mm (13/64")

Thru-hull cover:
GRP hull: T30 (ST 6.3x38) (x3)
Metal hull: Machine screws (not included)

INTERCEPTOR

4B INSTALL CONCEALED THRU-HULL FITTINGS UNDER THE WATERLINE

1

Fit the cable clip in the back plate or cut it off

2

Tighten: 27 mm (1 1/16") wrench
10 Nm (7.4 lb-ft)

Hold: 13 mm (33/64") wrench

NOTE!
M18 x 2.5

3

Servo unit:
T25 (PT 5.0x18)
(x3)
2 Nm (1.5 lb-ft)

NOTE!

INTERCEPTOR

5 INSTALL THE INTERCEPTOR FRONTS

6 PAINT THE INTERCEPTORS WITH ANTIFOULING

DISTRIBUTION UNIT

1 MOUNT THE DISTRIBUTION UNIT

Mount the distribution unit inboard, where it is easy to connect it to both the interceptors and the power supply (battery), e.g., in the engine room. Position the unit on a vertical ($\pm 30^\circ$) hard surface with the connectors facing downward. Ensure a minimum clearance of 50 mm (2") at the top for sufficient convection cooling.

2 CONNECT THE DISTRIBUTION UNIT

NOTE! The system allows an unpaired Interceptor mounted on the center of the transom. A centerline mounted Interceptor should always be connected to port side 3 to work properly. Detailed wiring diagram is available at the end of this folder.

CONTROL PANEL

1 ROUTE CABLES

Route the cables between the control panel(s), the distribution unit and optional equipment. Use optional extension cables if necessary. A detailed wiring diagram is available at the end of this folder.

2 PREPARE THE DASH

The control panel must be mounted within certain angles relative to the boat's axes for the built-in sensors to deliver reliable output.

Locate a free area on the dash suitable for mounting the control panel. Use the control panel's template as a guide to see if it will fit next to other instruments.

NOTE! 0.5 m (1.6 ft) safe distance to magnetic compass.

NOTE! Any angle between 0-180°

CONTROL PANEL

3 MOUNT THE CONTROL PANEL

1

Drill holes (x4)
Ø 2.5 mm (3/32")

Drill hole

1. Pilot hole Ø 3 mm (1/8")
2. Hole saw Ø 76 mm (3")

Flush mount option: refer to www.zipwake.com for a drawing and 3D model.

2

Prepare the cables
Route the standard and optional cables

3

Snap off the frame

4 Connect the cables on the back of the Control panel.

CONTROL PANEL

4 INITIAL START

Refer to the Operator's Manual for detailed information about setting up and operating the system.

SET UP THE SYSTEM

Press and hold the POWER/MENU button until the Zipwake logo appears on the display and follow the steps on the screen.

INTERCEPTOR CHECK

Carry out an Interceptor Check to verify function immediately after installation, before launching the boat.

NOTE - All readings must be green!

Corrective actions are always necessary when excessive torque levels are observed. Verify the flatness of the transom, excess use of sealant behind the interceptor and/or excess antifouling between the blades and adjust if needed.

VERIFY FUNCTION ON SHORE

1. Turn the Roll wheel clockwise
2. Port side Interceptor(s) should move out
3. Repeat counter-clockwise for starboard

IMPORTANT

Always use the controls to move the Interceptor blades. Never try to force the Interceptor blades by hand.
