

PRODUCT SPECIFICATIONS

DIGITAL LIGHT PDL

Digital Light is mixed PU/Copes film 90 microns in thickness on a slightly adhesive polyester carrier.

It allows you to print and cut small details and also gives the opportunity to re-attach small parts before heat transferring onto cotton and polyester fabrics.

Digital Light is recommended for speed cutting and easy weeding. It is compatible with all current printers using ECO-solvent and solvent inks. Small letters and motifs can be easily cut by all current CAD/CAM plotters after the printing process.

The PET liner should be removed hot. Digital Light is used for motifs and logos on sport, leisure and work wear.

We recommend evaluation on test material.

45° Blade Recommended

Print right reading.

150°C

60/80 gr

12 Seconds

Peel Warm/Hot

Wash cold (max 60°) inside out. Suitable for Tumble Drying.

Do not layer.

Iron inside out. Do not iron directly onto transfers.

Suitable for cotton, mixtures of polyester/cotton and polyester/acrylic.

Application tape required

Standard dimensions: 500mm x 25m
