

PRODUCT SPECIFICATIONS

GLITTERFLEX ULTRA AGU

Glitter Flex Ultra film is a brilliant and sparkling solution for fabrics especially those used in the fashion industry. It can be applied to dark and light fabrics made of **cotton, polyester or cotton/polyester blends, wool & linen.**

Glitter Flex Ultra is one of the most popular choices for retail stores because of the striking shimmering effect on fashion garments.

Guarantee for secure and long-lasting bond of Glitter Flex Ultra is only given when following the specified temperature and pressure conditions. We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter lettering, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

Holo Pink and Holo Orange are slightly translucent and will take on the colour of the garment, especially on black or dark coloured garments.

Glitter Flex Ultra contains actual polyester glitter particles, allowing this product to be sublimated onto, creating endless design possibilities.

60° Blade
Recommended

Cut this material in
mirror image

150°C - 160°C

2,0 - 3,0 bar
Medium pressure

8-12 seconds
