GLOSSY

POLI-FLEX® Glossy is a high-quality, ecologically proven polyurethane film with a high-glossy surface.

POLI-FLEX® Glossy is suitable to transfer onto textiles like cotton, mixtures of polyester/cotton and polyester/acrylic.
POLI-FLEX® Glossy can be used for lettering on t-shirts, sport & leisure wear, sport bags and promotional articles.

We recommend using a standard 45° blade. After weeding, the cut film is transferred by heat press. The PET liner should be removed warm. Afterwards we recommend pressing the material for another 2 sec. with the same parameters.

POLI-FLEX® Glossy has a self-adhesive PET liner which enables repositioning and excels due to an excellent opacity.

Guarantee for a secure and long-lasting bond of POLI-FLEX® GLOSSY is only given when following the specified temperature and pressure conditions. We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter lettering, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

45° Blade Recommended	Cut this material in mirror image	160°C	2,5 - 3,0 bar Medium pressure
15 Seconds	Peel Warm	Wash warm (max 60°C) inside out. Tumble Dry normal. Suitable for Dry Cleaning.	Layering not recommended
Iron inside out. Do not iron directly onto transfers.	Suitable for cotton, mixtures of polyester/cotton and polyester/acrylic.	Application Tape not required.	

Standard dimensions: 500mm x 25m
