

HAIRLINE

Hairline is made on polyurethane, with a stunning 3D effect of hairline.

Hairline is suitable for transfer to textiles like cotton, polyester, cotton/polyester blends. This product requires a sharp blade as is thicker than most other HTV products.

We recommend using a standard 45° blade, however depending on your machine you may need a 60° blade.

Guarantee for a secure and long-lasting bond of Hairline is only given when following the specified temperature and pressure conditions. We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter lettering, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

45° Blade
Recommended

Cut this material in
mirror image

140°C -150°C

2,0 - 3,0 bar
Medium/Firm
pressure

8-12 Seconds

Peel Warm/Hot
