

PRODUCT SPECIFICATIONS

PUFF AFI4297

PUFF PU is a polyurethane based foaming vinyl that self-expands by heating.

It gives your t-shirt design a raised "puff" effect, creating a luxurious look with more dimension.

Guarantee for a secure and long-lasting bond of Puff is only given when following the specified temperature and pressure conditions. We recommend evaluation on test material.

Due to the various influences which occur from production and transfer of plotter lettering, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.

45° Blade
Recommended

Cut this material in
mirror image

140°C - 150°C

3,0 bar
Medium to firm
pressure

8-12 seconds

Peel Warm
