Terpene Chart

Anecdotal Reports.

- + Great option for many patients looking for productive uplift but without a 'racy' sativa feeling.
- + Terpinolene-dominant cultivar differs from most sativas, which tend to be a combination of pinene/limonene/myrcene-dominant.
- + Used by many DVA patients for daytime control of chronic pain/PTSD/anxiety, while maintaining functionality/coordination.

TERPENE	W/W CONTENT	VAPORISATION POINT
Terpinolene	0.47%	185°C
Limonene	0.18%	176°C
Myrcene	0.15%	167°C
Pinene	0.10%	156°C
