Terpene Chart

Anecdotal Reports.

- + Most patients find this to be Alfie’s most sedating flower, and quite strong.
- + Used frequently for patients with sleep issues, though instead of an overly depressive/heavy indica, allows patients to go to sleep with positive mental state.
- + The extremely high level of myrcene at 1.4% is balanced with 0.36% limonene for associated mood enhancement.
- + Reportedly great for muscles relaxation, followed by heavy body sedation.
- + Most typically used nighttime for Sleep/Chronic Pain/PTSD, though a small percentage of patients (mostly high-THC DVA) report use of Orange Crescendo during the afternoon for Pain/Anxiety control.

TERPENE	W/W CONTENT	VAPORISATION POINT
Myrcene	1.40%	167°C
Limonene	0.36%	176°C
Caryophyllene	0.24%	160°C
Linalool	0.18%	198°C
