

Pastilles (10:10)

Alfie Sativa and Indica Pastilles (10:10) are carefully formulated and hand-made in small batches, infused with organic, single-cultivar solventless flower extract.

Crafted using all-natural ingredients, these premium pastilles deliver consistent flavour, texture and precise dosing, with each unit containing 10mg THC and 10mg CBD.

The balanced 10:10 THC:CBD formulation supports predictable cannabinoid delivery while maintaining the integrity of the original organic flower inputs. Produced in controlled small batches, both Sativa and Indica variants prioritise product consistency, reliability and ease of titration for clinicians and patients alike.
