

Southern Sky

Indica 26%

10g Flower	Schedule 8 Category 5	80/20 Indica
THC 26%	Terpene Content: 2%	RRP \$95
Top Reported Uses	Sleep Issues, Chronic Pain, Mood Disorders	
Flavour	Sweet, earthy, banana, creamy	
Typical Dosing Time	Evening Night   	

Anecdotal Reports

- (4) terpenes at significant levels over 0.15% w/w.
- Strong effect profile — we recommend lower vaporisation temperatures to begin with as patients trial this cultivar.
- High-limonene content may be helpful in balancing ‘heaviness’ of indica’s caryophyllene, myrcene, linalool content.
- Most typically used at nighttime for Sleep/Chronic Pain/PTSD, though a small percentage of patients (mostly high-THC DVA) report use of Indica 26% during the afternoon for Pain/Anxiety control. Reportedly used mostly during evening/nighttime for Sleep, Chronic Pain, PTSD. Occasional use during afternoon for Pain/Anxiety control.

Effects Scale

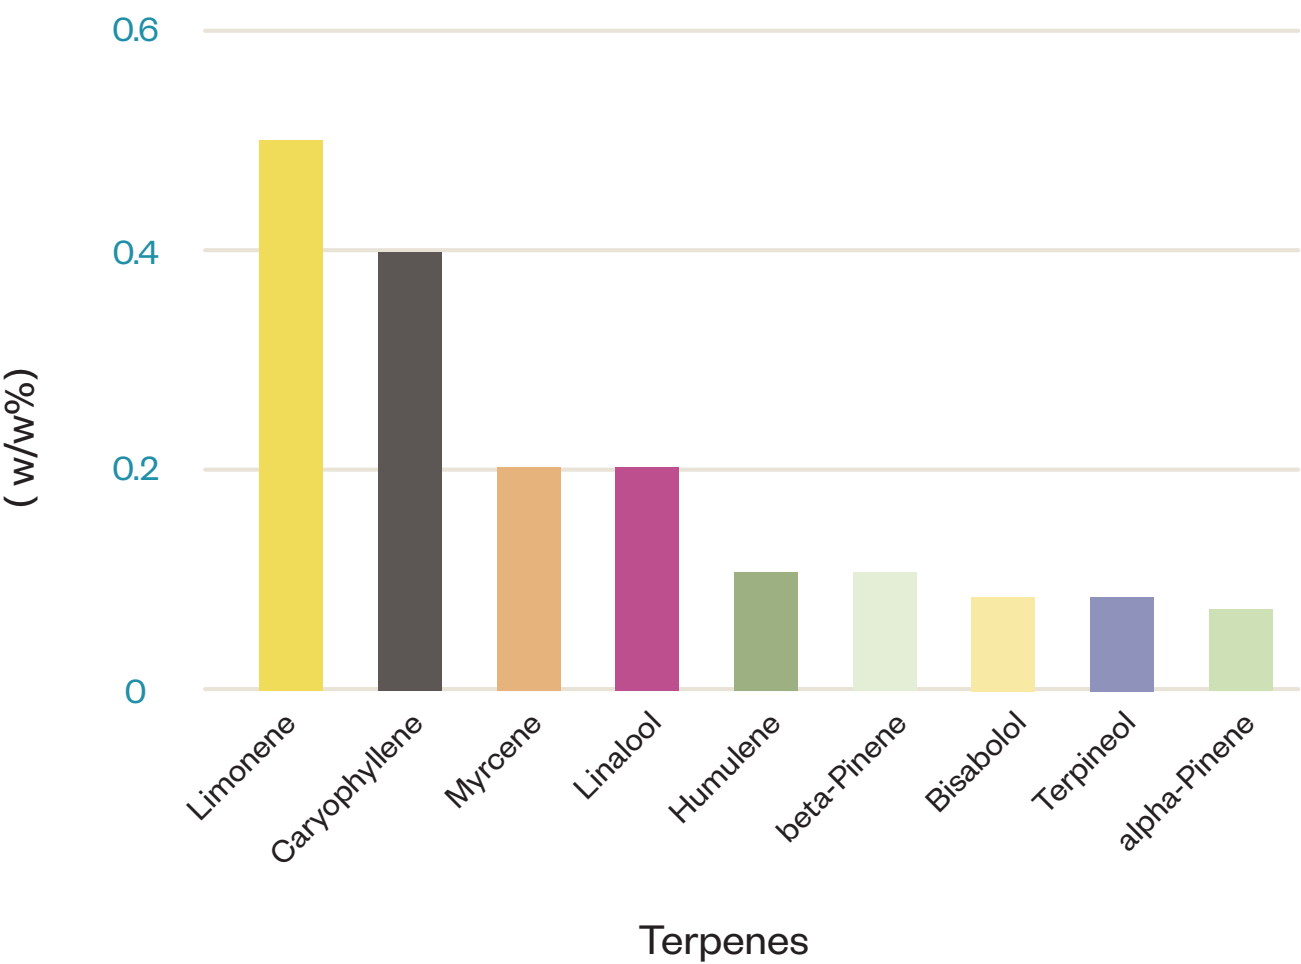

Product Overview
