

# Southern Sky Sativa 24%

10g Flower | Schedule 8 | Category 5 | 60/40 Sativa

THC 24% | Terpene Content: 2.76% | RRP \$95

**Top Reported Uses** | Anxiety, Depression, Stress, Pain

**Flavour** | Apple, woody, lavender

**Typical Dosing Time** | Day | Evening ☀️ 🌅 🌙

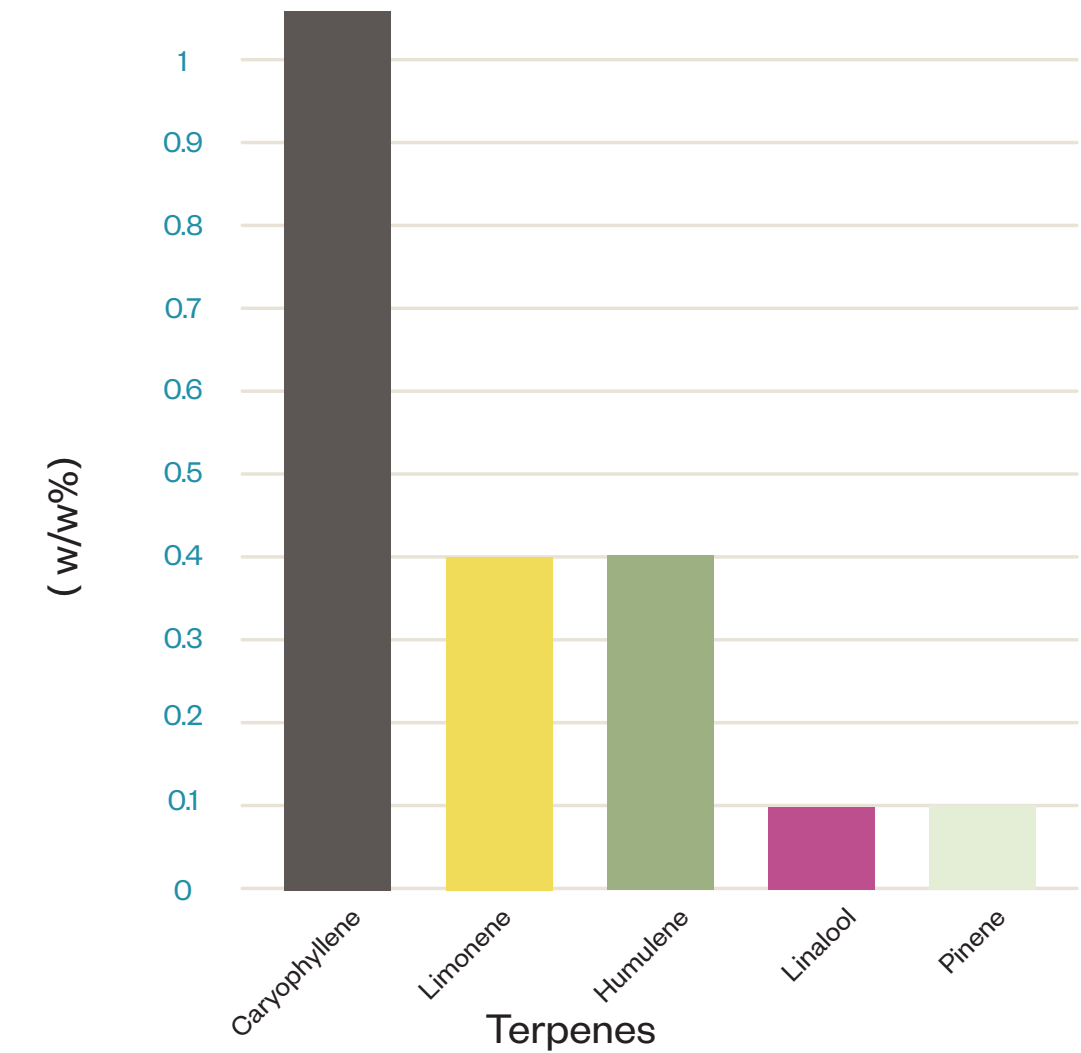

## Anecdotal Reports

- High terpene load (2.76% w/w) with five terpenes above 0.15% w/w, led by B-caryophyllene, A-humulene and limonene, contributing to a bright, aromatic vapour and fast onset.
- Patients commonly report energetic, creative and uplifted effects, with improved daytime focus and motivation when appropriately titrated.
- The limonene–bisabolol–linalool blend is described as providing mental clarity, while the caryophyllene–humulene backbone offers steady body comfort without sedation.
- Most often used daytime to early afternoon for Mood, Focus, Fatigue and Mild–Moderate Pain. A minority report late-afternoon use without overstimulation.
- New patients may benefit from lower initial vaporisation temperatures due to the stimulating onset of higher-terpene sativa profiles.

## Top Terpenes

- beta-Caryophyllene - 1%
- Limonene - 0.4%
- alpha-Humulene - 0.4%
- Linalool - 0.1%
- beta-Pinene - 0.1%
