SEIZE OUR KAIFENG AND MAKE THE MAIST OF LIFE

KAIFENG teeth are 3 layered double cross-lined acrylic teeth with outstanding wear resistance, anti-cracking, anti-stain and lower water absorption properties.

MAIST are high-performance 5 layered double cross-lined teeth, with the most outstanding properties: improved wear behaviour of implant dentures; lifelike layering in anterior with internal mamelons, and harmonized layering in posteriors. Both *Kaifeng* and *Maist* are available in the well known Vita® shade classification in a wide range of moulds. Buy in bulk and save!

VERY HAPPY JAN!

Crea.lign® Red-White Aesthetics are veneering composites for permanent veneering of metal, ceramic and polymer substructures. Its elasticity and hardness adapt to various substructure materials. Crea.lign contains only nano particles and no ground glass fillers. Consisting of 50% opalescent ceramic fillers and a high-strength oligomer matrix. Crea.lign creates natural beauty with unsurpassed light transmission. Greater strength than ceramic and reliable, with a permanent chemical bond with all frameworks.

(Codes: BRCLPN0G_)

Crea.lign® Gum Gels

Crea.lign® Gum Pastes

THE TALENTED MEISTER CONE

The Noritake Meister Cone is a paper abrasive material, suited to polishing teeth, resin teeth, resin dentures and metals. Polish curved surfaces with the greatest of ease, guaranteeing you a perfect finish. Polish curved surfaces with the greatest of ease, guaranteeing you a perfect finish. For porcelain and resin teeth, use S-Green and S-Yellow cones for polishing and morphological corrections. For Resin dentures, use the L-Red cone for polishing after your rough polish with a carbide bur.

(Codes: NDMCN_)

LIFT & SEPARATE

This acrylic and plaster separator ideal for prosthetic, orthodontic, and crown & bridge laboratories.

Providing the cleanest, easiest separation of acrylics from plaster and other gypsums available in the market.

Designed for trimming soft acrylics and soft relinings, these traverse section tungsten carbide cutters will give you the quality and assurance Edenta products provide in your laboratory.

LOOKING TO GET ATTACHED!

Here at Alphabond, we have a comprehensive range of dental attachments from **Bredent**, **CEKA**, and **Sterngold** to suit all your dental needs.

Attachments are the most frequently used retention systems for removable restorations as they can be simply handled and easily used.

Whilst small, attachments combine utmost reliability and offer superior wearing comfort. Friction can be systematically adjusted using the coloured matrices for individual pull-off forces, letting you customise handling specific to your patient's needs. Call us to find the attachment you're looking for!
