

# Neosafe Welding Blanket

High Performance Protection

  
**betaweld**<sup>®</sup>  
creating better welding solutions

## Applications & Features

Neosafe Welding Blanket is a high performance neoprene coated welding blanket which is ideal for protecting large and long painted or sensitive surfaces during the welding process.

Excellent for use in shutdowns or large projects where welding is carried out above existing structures etc. The neoprene provides a smooth surface for the welding spatter to fall away.

## Specifications:

Fire Retardant; Independently tested to AS2755.2-1985 (Vertical) & ISO 3795-1989 (Horizontal)  
Excellent for use in protecting large painted surfaces when welding.  
Provides isolated protection from sparks & spatter.  
Abrasion and allergen resistant.  
Service temperature 550°C  
Available in 50m rolls.

## Part Numbers.

P/N: 7177 - 1.0m width  
P/N: 7178 - 1.5m width
