DPU-20 Spring-Loaded Pump Dispenser – 58mm

PART NUMBER	DRUM SUITABILITY
CT-DPU-20	15 to 25 Litre Plastic Drum Cubes with a 58mm diameter cap screw

PRODUCT DESCRIPTION

Chemtools® DPU-20 Spring-Loaded Pump Dispenser is a heavy-duty push pump designed to handle viscous liquids such as creams, soaps, lotions, and gels. It suits most plastic drum cubes between 15 and 25 Litres with a 58mm diameter cap screw. The internal 37cm dip tube may be cut to size for containers of any height greater than 15cm.

DPU-20 Pump Dispenser is durable and sturdy for use in commercial or industrial environments. Each stroke dispenses a 30ml dose, and when fully depressed, it can be twist-locked in situ for safe transport or space-saving storage. A simple twist in the opposite direction releases the lock, and the stainless steel spring-loaded pump auto-extends to full height once more.

TECHNICAL DATA

Colour	White w/Black Cap	Weight	30g
Dose per Push/Stroke	30ml	Valve	Cage Ball
