

MS-AB206

ACTIVE SUBWOOFER WITH 2 CHANNEL CLASS-D SPEAKER AMP

Introducing the FUSION MS-AB206 Active Subwoofer with 2 Channel Class-D Speaker amplifier, part of the Signature Series range which represents the highest quality purpose-built marine audio equipment from FUSION.

With unrivalled bass reproduction, the MS-AB206 creates the perfect atmosphere for entertaining or relaxing. Designed and engineered in New Zealand, the MS-AB206 is tuned to produce the best acoustic result when installed in a saloon or cabin environment. When paired with the MS-BX3020 Signature Series cabin speakers the sound is remarkable and completes the home theatre experience.

The MS-AB206 features a 6" Dual voice coil down firing woofer which is acoustically coupled to a matching passive radiator for exceptional bass reproduction. The passive radiator is used to tune a small volume and driver for better low frequency performance, eliminating port turbulence and reducing motion compression.

A built-in 4 channel Class-D amplifier delivers efficient and high power output to the subwoofer with two channels as a dedicated speaker output. This Class-D amplifier is 2 Ohm stable, able to power 2 pairs of FUSION MS-BX3020 Signature Series cabin speaker with ease.

A full wiring kit is included for ease of installation

This product is rated True Marine, for dry area installation only and carries with it a 3 year limited consumer warranty.

FEATURES

- Dual Voice Coil Down Firing Woofer: 6" subwoofer acoustically coupled to the matching passive radiator, produces exceptional bass reproduction
- 6" Passive Radiator: Used to tune a small volume and driver for better low frequency performance, eliminating port turbulence and reducing motion compression
- Built-In 4 Channel Class-D Amp: Class-D high efficiency technology. Two dedicated channels power the subwoofer with the remaining two perfect to power MS-BX3020 speakers
- Installation Kit Included: Everything needed to connect the Active Subwoofer is included in the box
- Discrete Control Panel Cover: Hides all connection wires out of sight.
