GREENWELL™ WATER SAVER – FEATURES AND BENEFITS

- Provides a simple, quick and inexpensive method to apply deep watering to plants. In hot dry weather deep effective watering is so very, very important.
- Saves watering time.
- Greatly reduces the wastage of our water reserves by providing you with an extremely efficient, but very simple method of watering your plants in a manner which is friendly to the environment; whilst promoting healthier plants.
- Concentrates water, mulch and fertiliser where it is most needed, close to the plant base.
- Stops the scatter of mulch and fertiliser all over the garden by wind, rain or birds – particularly blackbirds.
- Is easily installed and repositioned. Can be very easily moved from tree to tree.
- Is unique because the *GreenWell* tree-protecting circle is easily opened and closed, so it can be placed around a tree at the time of planting or around a tree that was planted some time ago. A very versatile product.
- Eliminates water run-off; therefore is great for sloping ground, non-wetting soils, etc. In almost all gardens, situations are common where water tends to run away from a plant base. *GreenWell* completely solves this problem and therefore makes watering very much easier.
- Concentrates up to 26 litres (regular size) and 50 litres (large size) of water around a plant base ensuring all the water applied is made available to the tree roots.
- Keeps lawn or grass away from tree trunk; therefore is great for lawns.
- Is very tidy in appearance. Local Councils comment on its neat, professional appearance.
- Maintains a constant and totally efficient bowl integrity around tree trunk.
- Guards against ponding and resulting trunk rot problems because of constant and efficient bowl integrity. Earthen bowls break down – *GreenWell* is permanent.
- Guards against damage caused by Whipper Snippers.

Specifications

	STANDARD SIZE (1 PIECE)	LARGE SIZE (3 PIECE)
Top Diameter	430mm	585mm
Bottom Diameter	495mm	670mm
Height	200mm	280mm
Holding Capacity	26L	52L

PLGWLARG

Large size, 3 piece, green

PLGWG

Standard size, 1 piece, green

PLGWLARB

Large size, 3 piece, black

PLGWB

Standard size, 1 piece, black

Endorsements

Joel Ashton, Team leader – Arboriculture/Horticulture
City of Unley, South Australia, April 2010

“The use of the GreenWell product has become part of our planting procedure and guideline, its benefits in ensuring the survival of our juvenile trees are many.”

Matt Williams, Business Unit Manager
Citywide Service Solutions, July 2004

“GreenWell stood ‘head and shoulders’ above all competitors ensuring newly planted stock received appropriate amounts of water to the root ball, allowing a considerable reduction in the amount of water used to maintain the trees.”

Richard Gordon, Grounds Manager
St Ignatius’ College, South Australia, December 2007

“We have reduced our watering by half. The wells are doing a fantastic job of getting 100% of the water down to the root zone. For such a cheap product they are such a fantastic investment, our grounds are looking better for it. Thank you.”

Mark Dornau, Project Manager, Park Services
City of Port Phillip, Victoria, November 1999

“The survival rate of our immature street tree stock as a result of the waterwell has improved some 20% in terms of survival... and contributes to ‘best practice’ watering straight to where it matters most, the root ball.”
