

ECO-MESH®

Biodegradable Tree Guard

Environmental Restoration

A breakthrough environmental product, made from eco-friendly biodegradable polymers.

Let's eliminate plastic mesh tree guards with ECO-MESH TREE GUARD®. Plastic mesh guards can be an environmental hazard. If not retrieved, they may break down in the environment into harmful nanoparticles.

Strong and durable - it's proven to perform.

With a field life over 18+ months, ECO-MESH TREE GUARD® performs just as well as traditional plastic guards. It is however, designed to break down over the longer-term into carbon dioxide and water, with no resultant plastic nanoparticles.

// Available in a range of sizes

Product Code	Height	Tube Width
BPTG5027	500mm	270mm
BPTG8030	800mm	300mm
BPTG4540	450mm	400mm
BPTG6040	600mm	400mm
BPTG9040	900mm	400mm

/ Made from eco-friendly PLA+PBAT bio-polymers

/ Always plan to retrieve your guards after use. These guards have a considerable lifespan and can often be reused before biodegrading.

/ Suited for planting with hardwood stakes or bamboo canes.

Did you know? Bamboo canes are a highly sustainable product. Bamboo is fast growing and absorbs even more carbon dioxide from the atmosphere than trees!
