# COBBER™ STAPLE GUN SERIES 2

Introducing the **COBBER™ Staple Gun Series 2**. Constructed of the lightest weight materials, including 5005 aluminium body, stainless steel drive shaft, Susta-glide moly filled dry lube casing, and for low maintenance the **COBBER™ Staple Gun** has monomer cast bushes.

The **COBBER™ Staple Gun Series 2** has been designed for excellent performance on sites up to 45° degrees gradient, to accommodate this the handle is fully adjustable and can rotate to 90° degrees.

## COBBER™ Features

### PSI TECHNOLOGY (POSITIVE STAPLE INSERTION)

The Patented PSI Technology is the much anticipated anti-jamming device developed by the **COBBER™** International Team.

This technology resolves the problems of multiple staples jamming in the gun, eliminating poor performance, and site problems experienced by other staple guns throughout the industry.

### EASY GLIDE SYSTEM

The **COBBER™** patented Easy Glide system allows high performance with no field maintenance. Weighing under 5.5 kgs the **COBBER™** is the lightest, fastest and most reliable fastening system available.

### COBBER STAPLES

**COBBER™** international delivers the complete package with staples being manufactured & designed specifically for the **COBBER™** staple gun.

## COBBER™ Benefits

### LIGHT WEIGHT

The **COBBER™** weighs in under 5.5 kgs making it easy to hold, easy to manoeuvre, and supporting OH & S.

### PERFORMANCE & ACCURACY

The **COBBER™** can deliver a staggering 3300 staples per hour with accuracy on varying gradients.

### LESS DOWN TIME & INSTANT STAPLE REMOVAL

The **COBBER™** Staple Gun series 2, has a quick release opening carriage for easy site inspection

### SAFE TO OPERATE

The **COBBER™** is so light and easy to operate, reducing stress and fatigue compared to other industry models.

Available in two sizes, the **COBBER™ 150** for 150 mm staples, and a **COBBER™ 200** for 200 mm staples. Both are made from HD nail wire at an average of 900 Mpa.
