

Mallee Mesh

Revegetation

Arboregreen's Mallee Mesh Tree Guards protect your saplings from foraging animals. The open mesh construction means they are less likely to blow over in high winds whilst helping plants grow to be resilient to local conditions.

The mesh guards are cost effective for large planting projects; they are compact, simple to transport, easy to handle and quick to install.

The guards are available in two main variants:

- / Wallaby and Kangaroo guards available in packs of 20 flat-packed panels. The Kangaroo guard is taller & constructed of a heavier gauge wire
- / Sheep and Cattle guards are constructed from heavy gauge wire and offer a cost and time efficient option to alternative methods of installing guards for large browsing animals

Product codes

- / Kangaroo Guard, 1.2m x 460mm dia.
PLSMT1500430
- / Wallaby Guard, 800mm x 35mm dia.
PLSMT800350
- / Sheep Guard, 1.5m x 1.2m x2 panels
PLSG1500-SET
- / Cattle Guard*, 1.95m x 750mm x2 panels
PLCG19501500
*panels are pre-bent 5mm wire & include 2x star pickets plus 15m of barb wire
