

Sleeve Treeguard

The Sleeve Treeguards are widely used for protecting young seedlings from harsh elements and harmful small browsing animals. Tree Sleeves are an economic tree guard that is long lasting and reusable.

Applications

Use the Sleeves in any situation where you have a limited budget, but need long lasting protection.

Benefits

- Punched for ventilation
- Long lasting
- Conveniently boxed 330 per carton to suit 1000 canes, as three canes are used per sleeve

Specifications

450mm H x 350mm sides
Available in packs of 330

Installation Tips

There are many ways to install these, the most common being the following:

Tap 2 canes, about 400mm apart, on one side of your plant, slide the sleeve over these and your plant, and put the third cane into the sleeve and pull it out till the plant is in the centre of the guard and the guard is tight, tap the third cane into the ground.
