

# Fluted Guards

## Revegetation

Fluted tree guards are a rigid & durable, ideal for protecting young trees from wind damage and foraging animals. They are fast to install and remain presentable much longer than other forms of tree guard.

### Welded seams

Unlike earlier versions which had to be joined together, these guards are welded at one seam, and folded at the corners. Available with options such as perforated holes, various heights, different weights (thickness / gsm) there's a long-life guard to suit most projects. Used with our 'no-spin' rectangular hardwood stakes these are one of the fastest tree guards to install. They can often be re-used for multiple projects and collected at the end of their lifespan to be recycled.

- / Protects young plants and trees during the crucial first years
- / Flat packed for easy transport
- / Easy to remove without damaging the plant
- / Long life span; the guards can often be re-used
- / Fast to install using a 'no-spin' 11x38mm rectangular hardwood stake
- / Also available in a lighter weight 330gsm
- / Combine with Jute or recycled paper tree squares to control weed growth

### Product codes

- / Mallee Flute, 450mm x 200mm sides
