

# MEDICAL IMAGES ON THE GO

iQ-WEB2GO is an add-on to iQ-WEB for web-based viewing of radiology images on iOS and Android based portable devices

- Instant access to any radiology image and report without running an installer
- Excellent solution for clinical reference for referring physicians
- Useful for remote and subspecialty consultation
- Quick, easy and secure

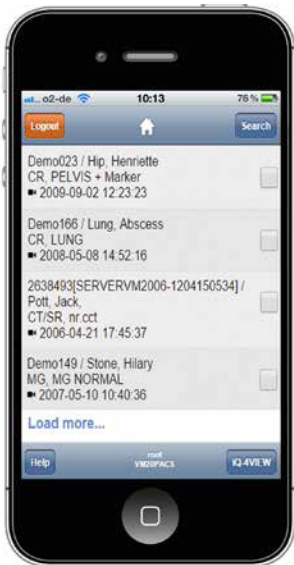

# iQ-WEB2GO FEATURES\*

## WEB VIEWER

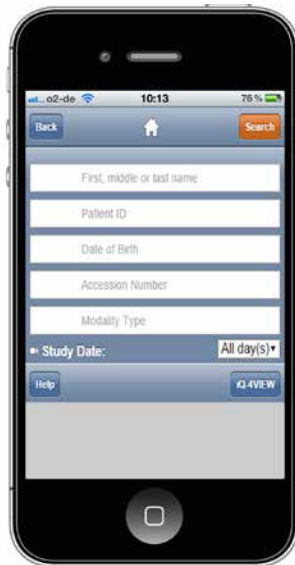

- Web-based visualization of medical images
- Displays Structured Reports and Encapsulated PDF documents
- Overview of multiple studies at thumbnail level
- Quick and easy selection of series via tapping on image
- Zoom/pan
- User-friendly search and navigation tools
- Optimized user privilege handling

## LICENSING

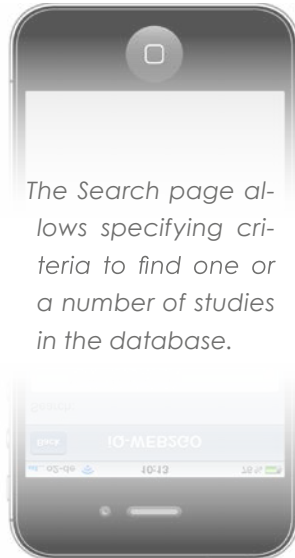

- Unlimited number of users
- Included at no extra charge for iQ-WEBX10 and higher editions\*\*

The Studies overview page displays the studies sorted by last name. Read studies are displayed in regular font, unread studies in bold.

The Search page allows specifying criteria to find one or a number of studies in the database.

The Series overview page provides easy access to selected images.

The Images page displays an image in full screen mode, allowing zoom/pan.

\* Detailed information on iQ-WEB2GO's system requirements is available in the iQ-WEB2GO Administration Guide or the iQ-SYSTEM PACS Hardware Purchasing Guide.

\*\* Additional charge for iQ-WEBX 2 or 5. Service package fees apply for all licensing.
