

FOR PREMIUM TURF MAKE YOUR CHOICE GOLD

Olympic Gold Blend is a high performance mix, combining the best qualities of three premium ryegrasses. It features the fine texture of SR4600, brilliant deep green colour and salt tolerance of Bonneville and the excellent drought performance of SR4660ST.

“These varieties were chosen because of their excellent wear tolerance, ability to recover from wear, improved summer stress tolerance & winter activity. A major feature is their vivid dark green colour.”

Adrian Black, Horticulture Manager, Melbourne Olympic Parks

Seed Mixture By Count:

- 34% SR4600 Turf Type Ryegrass
- 33% SR4660ST Turf Type Ryegrass
- 33% Bonneville Turf Type Ryegrass

Endophyte:

Olympic Gold exhibits very high endophyte levels, enhancing resistance to ground feeding insects, as well as promoting heat and drought tolerance.

Olympic Gold is a fine textured, dense clean cutting turf with exceptional deep green colour. It is ideal for new establishment or oversowing quality sportsfields, particularly in early spring and autumn. It is also compatible with other grasses including tall fescue, fine fescue and couch.

Sowing and Establishment:

For new sowing, a rate of 3-4kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover. For moderate existing cover, apply at half the new seeding rate.

To enhance establishment a complete starter fertiliser is recommended at label rates to initiate growth. Sufficient irrigation needs to be applied to provide adequate moisture to the young seedlings.

Maintenance:

Olympic Gold Blend can tolerate close mowing of 5mm under high maintenance with an optimum mowing height of 20-30mm. Olympic Gold will respond well to a balanced regular fertiliser programme throughout the season.
