

SPORTSMAN SEED BLEND

Sportsman is ideal for Council sportsfields and parkland oversowing.

It is a 100% blend of Turf Type Perennial Ryegrass and Sportsturf Perennial Ryegrass.

Sportsman is quick to establish and has good wear tolerance.

Key Attributes:

- High wear tolerance for sports turf, parkland and sports areas
- Dark green colour
- Quick establishment
- Winter active

Uses

Sportsman Blend is highly recommended for permanent turf applications, or for winter oversowing of dormant warm season grass.

Sowing & Establishment

For new sowing, a rate of 3–4kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover. For moderate existing cover, apply at half the new seeding rate.

During sowing activity, a complete starter fertiliser is recommended at label rates to initiate rapid establishment.

Maintenance

Sportsman Blend can be mowed as low as 10mm, however the recommended mowing height in most applications is 25mm.

Seasonal application of a balanced NPK fertiliser is recommended to sustain a healthy sward.
