ZEROTAPE® - THE MOST INNOVATIVE TAPING SYSTEM EVER PRODUCED...

Adhesive tape has been used to seal packages for almost a century. Now after 100 years there is finally a solution that promotes efficiency, comfort, usability and performance!

Say goodbye to aching wrists!

The ZeroTape® dispenser features a radically new design that reduces wrist strain making light work of packing. The ergonomic design and ventilated rubber padded handle also improve user experience and comfort.

No more putting rolls on backwards

The ZeroTape® System features a unique one-way roll core, meaning it is no longer possible to insert a roll of tape incorrectly! With the quickest roll change in the industry, you will reduce wasted time & frustration every time.

Longer rolls

The ZeroTape® rolls of tape are 160m long. That's more than double the length of traditional rolls of tape, cutting your roll changes in half!

TOP FEATURES

- Ergonomic design** Relieves strain on the wrist, requiring 75% less wrist extension
- High performance** 3x fewer roll changes, 3x less storage space
- Lightweight** 25% lighter than conventional dispensers
- Safe** Easy blade changes due to click-in system, safety serrated blade
- Comfortable** Ventilated handle, rugged housing, quiet dispensing
- Unique** Special roll core makes incorrect insertion a thing of the past

OPERATIONS OUPUT

Improved Comfort

ZeroTape® was created with the end user in mind. The result is a tape dispenser which has been ergonomically designed. The position of the handle is strategically placed to minimise strain on the wrist. It also has a ventilated handle which is comfortable to hold and is significantly lighter than other tape dispensers on the market.

Increased Productivity

The foolproof click reload system means there is no time wasted changing tape rolls. ZeroTape® also holds a tape roll which is longer than conventional tape (as well as lighter and stronger) so changes and disruption are kept to a minimum.

Conventional Dispenser

Starting the taping process:

53° wrist extension

While dispensing:

36° wrist extension

ZEROTAPE®

75% less wrist extension

ZERO degrees of wrist extension
