

e-Tape - The Ultimate Packaging Tape!

Jumbo size rolls to save time, effort and money!

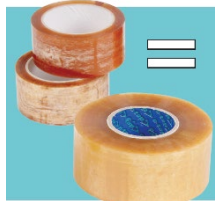

e-Tape is the ultimate in packaging tapes. Rolls of e-Tape are double the length of standard packaging tape, offering cost savings and less downtime when changing rolls.

Designed and made in Europe, e-Tape is a premium quality packaging tape that will stick to all surfaces. The e-Tape rolls are applied with the unique e-Tape dispenser.

Less roll changes

Every roll of e-Tape is 150m long – twice the length of conventional packaging tapes. This means you'll cut the number of roll changes by half!

Save storage space

Because every roll is twice as long, each carton of e-Tape contains twice as much tape! You'll reduce the space needed to store packaging tape in your warehouse.

European design

The ergonomic dispenser is designed to reduce wrist strain whilst the retracting blade ensures safe operation.

Reduce noise

The unique silent mechanism means no more harsh squealing tape noise. e-Tape is a great choice for use near phones and in offices.
