

HOODED SHRINK MACHINE

Hooded Shrink Machine to provide a fast heat-sealing solution for medium sized packages.

The Hooded Heat Shrink Machine will provide you a fast and safe way of heat sealing packages. The user inserts the item between the 2 layers of shrink film, and pulls the item through to the hooded tunnel. The user then drops the lid on the machine, and this automatically activates the heat seal function for the preset number of seconds. After this, the machine will automatically switch to 'shrink' mode, activating its powerful fans and heat elements to shrink the wrap around your parcel.

KEY FEATURES

- Fast and efficient method of heat sealing packages
- Capable of wrapping up to 4-8 pieces per minute
- Heavy Duty Steel Construction for durability
