Machine Plus

Dishwashing Machine Detergent

MACHINE PLUS is a pale amber liquid based on a blend of heavy duty alkaline detergents combined with soil suspending agents, anti-scaling components and a stabilised chlorine de-staining agent.

Application:

MACHINE PLUS is formulated especially for use with Automatic Dispensing Equipment. This is a complete hands-free system which ensures optimum concentration and economy of use of detergent is maintained at all times. The dispenser involves the use of a potentiometric probe which "senses" detergent concentration in the wash tank and signals the pump when to add more detergent.

Direction for use:

MACHINE PLUS is dosed automatically through the dispensing unit and maintained at a concentration of 1 - 2 gm /litre. Operating temperature is normally between 75 - 80°C. MACHINE PLUS should always be used in conjunction with RINSE PLUS (Rinse Aid) to ensure all washed articles are completely clean and dry.

Features & Benefits:

- Concentrated liquid - ensures economical dose rates.
- Contains anti-scaling agents - minimises the need to descale the dishwasher.
- Contains soil suspending agents - prevents redeposition of soils.
- Chlorine based - removes and controls all tannin and protein stains.

Suitability of chemical for food preparation areas:

When used as directed MACHINE PLUS is suitable for use in kitchens and food preparation areas.

Health & Safety Information:

See separate Safety Data Sheet available on request.

Packaging:

5 Litre Polyethylene drum, 15 Litre Polyethylene drum or 20 Litre Polyethylene drum.

Available sizes with codes

5L 140100 | 15L 140110 | 20L 140105
