

Acid Cleaner & Sanitiser

Removes mineral deposits, milk stone build up and sanitises in one operation. It also removes surface rusting from ferrous metals and protects against subsequent re-rusting.

DIRECTIONS

Water hardness build up and milk stone removal requires a 2.5% solution in hot water (65°C) to be circulated for 15-30 minutes then rinsed. Cooler water may be used with higher concentrations or longer contact times. Rinse with cold water. For rust removal use neat or dilute to 20% solution. Apply to surface and leave for 5-30 minutes before rinsing with cold water.

GOOD PRACTICE

Under Good Practice Protocol based on accepted international research a 1% solution of this product, diluted with potable water, is recommended with liberal application on clean hard surfaces with a minimum contact time of 10 minutes. At this concentration the product provides 100PPM QAC.

MPI APPROVAL

MPI APPROVED C41 (All animal product except dairy)

After using this compound, food surfaces must be thoroughly rinsed with potable water before production starts.

LOW pH

HIGH FOAM FORMULA

HIGH STRENGTH

QUAT SANITISER

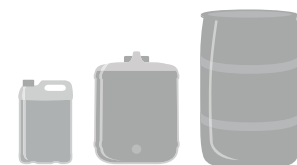

ACID ALKALI BIO-FILM BREAK CLEANER

EFFECTIVE PATHOGEN CONTROL

FOOD PROCESSING General plant foaming, acidic spot cleaning, acidic break cleaning & acidic foaming cleaner/sanitiser

PROPERTIES

APPEARANCE	Clear Colourless Liquid
FRAGRANCE	No Fragrance
pH	2 (@1% soln)
MICROCID	100ppm QUAC (@1% soln)

REORDER

5Lt	FK-PHOSCL05
20Lt	FK-PHOSCL20
200Lt	FK-PHOSCL200

CHEMICAL SOLUTIONS SUSTAINABILITY POLICY

We are committed to continual improvement in our environmental performance, and have established a number of goals and initiatives helping achieve this objective. Where possible we always use biodegradable raw materials and all our finished product packaging is reusable or recyclable.

This is only a start, we continually strive to better our environmental performance.
