

DAZZLE

Pre Soak Detergent/Destainer

Description:

Dazzle is a white powder with no odour, containing a minimum of 3% available oxygen. It is based on oxygen bleach and sophisticated enzyme technology to provide safe, odourless, and highly environmentally acceptable food stain removal technology for the modern kitchen or laundry.

The enzyme system comprises of three types of enzymes: a protease for digesting protein, amylase for starches and lipase for fats, plus deflocculants, surfactants, and a catalytic system to activate the oxygen bleach at lower temperatures.

Dazzle is effective as both a pre-soak sanitiser and a destainer at low concentrations to provide economical solutions for achieving sparkling results. It is readily soluble, free-rinsing, and because of its mildly alkaline nature is non-corrosive when used as a cleaner in food display and preparation areas.

Dazzle is useful in laundry applications both in stain removing soaks and when added to hot washes to provide safe bleaching.

MPI Approved C32 [All animal product except dairy]

Directions for use:

Pre-soak and Cleaner	Remove Protein deposits from:Cups, glasses, coffee jugs, jugs, teapots, nip pourers, fridges, beer drains Cutlery - use a small plastic container and replace the soak solution with fresh Dazzle periodically through the day.	10g/L
