Suma Combi+ LA6

Liquid machine
dishwash
detergent with
built-in-
rinse-aid for
medium/hard

Suma Combi + LA6 is a combined concentrated liquid mechanical ware washing detergent and rinse aid in one specially formulated to provide soil removal for 12odH, 21oFH or 215 ppm water hardness conditions and optimum drying performance.

Key Properties

Suma Combi + LA6 is a heavy duty alkaline liquid detergent which is suitable for use in a wide range of single tank ware or front loader washing machines (no conveyor or multi-tank). It contains a blend of caustic alkali and scale control agents, which will provide soil removal. The high level of powerful scale control agents will also prevent scaling in 12odH, 21oFH or 215 ppm water hardness conditions. Because of the unique rinse aid additive changing the behaviour of the water there is no need for a separate rinse aid.

Benefits

- Cuts through grease and dried-on food
- Being highly concentrated gives greater economy in use
- Prevents scaling of the dish wash machine even in 12odH, 21oFH or 215 ppm water hardness conditions
- Ensures quick drying
- Gives streak and spot-free results

Use Instructions

Suma Combi + LA6 is normally applied using Diversey automatic dispensing equipment. It can however be used in conjunction with an integral dosing pump. To ensure perfect cleaning results in 12odH, 21oFH or 215 ppm water hardness conditions, dose at a concentration of 1 - 4 ml/litre, depending on local site conditions. At 2 ml/litre, this will prevent scale deposits in water containing up to 205 ppm CaCO₃.

The product is not suitable for systems where currently an acidic rinse aid is used to avoid scale in the rinse section/boiler, and where a detergent to rinse aid dosage is below 2:1

At first use, rinse pump, and transport tubes of the dosing system to avoid possible crystallisation in these tubes caused by mixing of products and empty the rinse line.

Liquid machine dishwasher detergent with built-in-rinse-aid for medium/hard

Technical Data

Appearance: clear yellow liquid

PH: (1% solution) 12.2

Relative density 1.27

Dilution rate: Use neat

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet. Store in original container. Avoid extremes of temperature.

Product compatibility

Under recommended conditions of use, Suma Combi + LA6 is suitable for use on most materials commonly encountered in the kitchen. Do not use on alkali sensitive items such as copper, brass, aluminium or rubber.
