

ZOONO[®]

A NEW ERA OF ANTIMICROBIAL SOLUTIONS

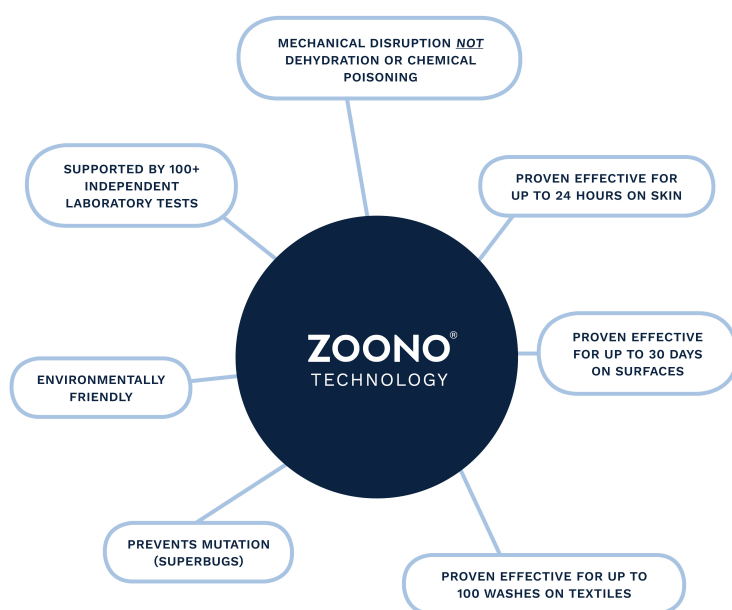

ADVANCED HAND SANITISER

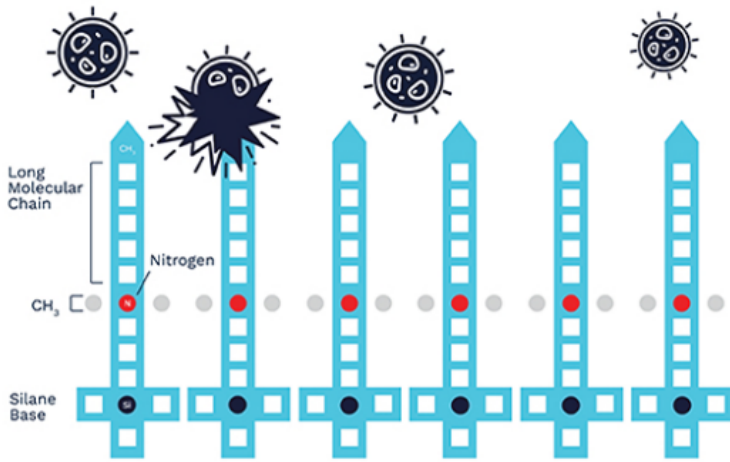

ONE APPLICATION LASTS ALL DAY

- Kills 99.99% of germs for up to 24 hours
- Alcohol free
- Gentle on skin
- Dermatologically approved and suitable for delicate or sensitive skin.

THE DIFFERENCE

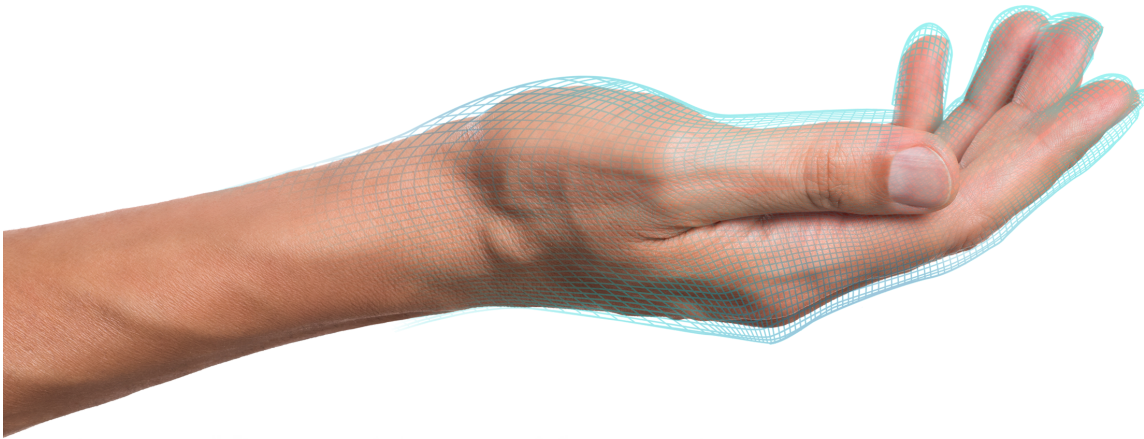

HOW ZOONO WORKS

Zono works by the formation of a molecular layer of covalently bound biocidal molecules based around silicone polymer chemistry.

The simplest analogy is that antimicrobial “spikes” are formed on the surface that are highly positively charged and as a result of this charge, the negatively charged molecular structure of microorganisms are attracted to the “spikes” and the cell wall and membrane is lysed; the organism is then killed and the process continues.

Target organism	Reduction after 1 hour	Reduction after 14 days	Reduction after 28 days
Staph. aureus	99.99%	100%	100%
Pseudomonas aeruginosa	99.99%	99.96%	99.96%
Escherichia coli	99.99%	100%	100%
Proteus vulgaris	99.99%	99.93%	99.93%
Methicillin resistant Staphylococcus Aureus (MRSA)	99.99%	99.97%	99.97%
Vancomycin resistant Enterococcus (VRE)	99.99%	99.97%	99.96%
Citrobacter Freundii	99.99%	99.98%	99.98%

PROVEN BY OVER 100 INDEPENDENT LAB TESTS

Zono conforms to regulations from around the world and has passed PAS 2424, EN13697, EN1276, EN1650 amongst many more antimicrobial efficacy tests.
