

SAFETY DATA SHEET

Persil Professional Laundry Liquid (Sensitive)

Section 1. Identification

| | | |
|----------------------------|---|--|
| Product name | : | Persil Professional Laundry Liquid (Sensitive) |
| Product code | : | 200000269865 |
| CUC Code | : | 69722028 |
| DU Code | : | Not available. |
| Product description | : | Fabric washing Liquid |

Relevant identified uses of the substance or mixture and uses advised against

| Identified uses | |
|-----------------|--|
| Consumer uses | |

| | | |
|---|---|---|
| Supplier's details | : | Unilever Asia Private Limited 18 Nepal Park Singapore 13940 Emergency contact number: (+65) 6643 3000 |
| Distributor address | : | Mayo Hardware NZ Ltd 20 Rockridge Avenue Penrose Auckland 1061 New Zealand mayohardware.com.au 09 415 6240 |
| Emergency telephone number (with hours of operation) | : | POISONS INFORMATION CENTRE [24 hours]: 0 800 764 766 |

Section 2. Hazards identification

| | | |
|----------------------------|---|--|
| HSNO Classification | : | 6.3 - SKIN IRRITATION - Category B 6.4 - EYE IRRITATION - Category A (Irritant) |
|----------------------------|---|--|

Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 0 % 0 % 0 %

Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 0 %

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Regulations 2001 and has been classified according to the Hazardous Substances (Classifications) Regulations 2001.

This material is not classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

GHS label elements

Signal word : Warning

Hazard statements : H316 Causes mild skin irritation.
H319 Causes serious eye irritation.

Precautionary statements

Prevention : P103 Read label before use.
P280 Wear eye or face protection.
P102 Keep out of reach of children.
P264 Wash thoroughly after handling.
P101 If medical advice is needed: Have product container or label at hand.

Response : P332 + P313 If skin irritation occurs, get medical advice/attention.
P305 IF IN EYES:
P351 Rinse cautiously with water for several minutes.
P338 Remove contact lenses, if present and easy to do.
P338 Continue rinsing.
P337 + P313 If eye irritation persists, get medical advice/attention.

Storage : Not applicable.

Disposal : Not applicable.

Symbol : 

Other hazards which do not result in classification : None known.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

| Ingredient name | % (w/w) | CAS number |
|-----------------|---------|------------|
|-----------------|---------|------------|

| | | |
|--------------------------------|-----------|------------|
| Laureth-7 | >=5 - <10 | 68439-50-9 |
| Sodium Dodecylbenzenesulfonate | >=5 - <10 | 68411-30-3 |
| Sodium Laureth Sulfate | >=3 - <5 | 68891-38-3 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention if adverse health effects persist or are severe. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Inhalation : No known significant effects or critical hazards.

Ingestion : No known significant effects or critical hazards.

Skin contact : Causes mild skin irritation.

Eye contact : Causes serious eye irritation.

Over-exposure signs/symptoms

| | | |
|-------------------|---|--|
| Inhalation | : | No specific data. |
| Ingestion | : | No specific data. |
| Skin | : | Adverse symptoms may include the following: irritation redness |
| Eyes | : | Adverse symptoms may include the following: pain or irritation watering redness |

Indication of immediate medical attention and special treatment needed, if necessary

| | | |
|-----------------------------------|---|--|
| Specific treatments | : | Not available. |
| Notes to physician | : | No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

| | | |
|---|---|---|
| Suitable | : | Use an extinguishing agent suitable for the surrounding fire. |
| Not suitable | : | None known. |
| Specific hazards arising from the chemical | : | In a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous thermal decomposition products | : | Not relevant for these kind of mixtures |
| Hazchem code | : | Not available. |
| Special precautions for fire-fighters | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
| Remark | : | Not relevant for these kind of mixtures |

Section 6. Accidental release measures

| | | |
|--|---|--|
| Personal precautions, protective equipment and emergency procedures | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is |
|--|---|--|

Environmental precautions

inadequate. Put on appropriate personal protective equipment (see Section 8).

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill

: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Conditions for safe storage,
including any incompatibilities**

: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Version: 1.0

Date of issue/Date of revision: 10.11.2022

Date of previous issue: 00.00.0000

Occupational exposure limits

None.

User-defined 1

Appropriate engineering controls : No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Environmental exposure controls : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory protection : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Hand protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Eye protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Section 9. Physical and chemical properties

Appearance

Version: 1.0

Date of issue/Date of revision: 10.11.2022

Date of previous issue: 00.00.0000

| | | |
|---|---|---|
| Physical state | : | liquid |
| Color | : | No results available. |
| Odor | : | Characteristic. |
| Odor threshold | : | Not available. |
| pH | : | 8 [Conc. (% w/w): 1,000 g/l] |
| Melting point | : | Under normal conditions, melting point/freezing point will not be observed |
| Boiling point | : | Under normal conditions, initial boiling point/boiling range will not be observed |
| Flash point | : | Non-flammable. |
| Evaporation rate | : | Not available. |
| Flammability (solid, gas) | : | Non-flammable. |
| Lower and upper explosive (flammable) limits | : | Lower: Not flammable Upper: Not flammable |
| Vapor pressure | : | Not available. |
| Vapor density | : | Not relevant for these kind of mixtures |
| Relative density | : | Not available. |
| Solubility | : | Not available. |
| Solubility in water | : | Soluble |
| Partition coefficient: n-octanol/water | : | Not applicable for mixtures |
| Auto-ignition temperature | : | Not flammable |
| Decomposition temperature | : | Not available. |
| Viscosity | : | Dynamic: 450 mPa.s |
| | | Kinematic: Based on available data, the classification criteria are not met. |

Aerosol product

| | | |
|---|---|---|
| Type of aerosol | : | Not relevant for these kind of mixtures |
| Heat of combustion | : | Not relevant for these kind of mixtures |
| Ignition distance | : | Not applicable. |
| Enclosed space ignition - Time equivalent | : | Not applicable. |
| Enclosed space ignition - Deflagration density | : | Not applicable. |
| Flame height | : | Not applicable. |
| Flame duration | : | Not applicable. |

Section 10. Stability and reactivity

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : No specific data.

Incompatible materials : No specific data.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on the likely routes of exposure

Inhalation : No known significant effects or critical hazards.

Ingestion : No known significant effects or critical hazards.

Skin contact : Causes mild skin irritation.

Eye contact : Causes serious eye irritation.

Symptoms related to the physical, chemical and toxicological characteristics

Inhalation : No specific data.

Ingestion : No specific data.

Skin contact : Adverse symptoms may include the following:
irritation
redness

Eye contact : Adverse symptoms may include the following:
pain or irritation
watering
redness

Delayed and immediate effects and also chronic effects from short and long term exposure

Acute toxicity

Conclusion/Summary

Skin : Not sensitizing

Respiratory : Not sensitizing

Potential chronic health effects

Conclusion/Summary

: Based on available data, the classification criteria are not met.

Carcinogenicity

Conclusion/Summary

: Based on available data, the classification criteria are not met.

Mutagenicity

Conclusion/Summary

: Based on available data, the classification criteria are not met.

Teratogenicity

Version: 1.0

Date of issue/Date of revision: 10.11.2022

Date of previous issue: 00.00.0000

Conclusion/Summary : Based on available data, the classification criteria are not met.

Reproductive toxicity

Conclusion/Summary : Based on available data, the classification criteria are not met.

Specific target organ toxicity

Not available.

Aspiration hazard

Not available.

Numerical measures of toxicity

Acute toxicity estimates

| Route | ATE value |
|-------|--------------|
| Oral | >5,000 mg/kg |

Other information : Not available.

Section 12. Ecological information

Ecotoxicity : No known significant effects or critical hazards.

Aquatic and terrestrial toxicity

Conclusion/Summary : No known significant effects or critical hazards.

Persistence/degradability

Conclusion/Summary : The surfactants used in this mixture are readily biodegradable.

Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|--|--------|-----|-----------|
| sodium benzenesulfonate C10-13 alkyl derivs. | 3.32 | - | low |
| Alcohols, C12-14, ethoxylated, sulfates, sodium salts, 1 - 2.5 moles ethoxylated | 0.3 | - | low |

Mobility in soil

Soil/water partition coefficient (KOC) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

| Regulatory information | UN number | Proper shipping name | Classes | PG* | Label |
