

Oven Blast & Grill Cleaner

Oven and Combi Cleaner

Oven Blast & Grill Cleaner works by effortlessly locking onto rust, dirt, and grime when a surface is heated, then pulls off all loosened soil with the rinse water. Oven Blast & Grill Cleaner contains over 47g/L potassium hydroxide, wetting and emulsifying agents and sequestrants. It has a clear brown appearance and a density of at least 1.105kg/L

MPI APPROVED C31 (All animal product except dairy) Before use, all edible product and packaging material must be removed from the room. After using this compound, food surfaces must be thoroughly rinsed with potable water before production starts.

Directions:

CAUTION: Contains over 47g/L potassium hydroxide: wear gloves, eye protection, and protective clothing where there is a risk of skin contact.

Combi ovens: Set uptake tube through lid with enough length to reach bottom of container. Auto-doses to machine. Or Manually spray onto warm oven surfaces, turn on cleaning cycle.

Other ovens are best cleaned by preheating the surface to about 95°C for quickest results. Spray or pour OVEN BLAST onto the preheated surface. Allow one or two minutes to work, then scrape off residue with a spatula. Rinse with water or dilute vinegar after scraping. Repeat if necessary.

Test before use on brass, tin, copper, galvanised and painted surfaces - painted surfaces are best tested at a 10% dilution. Do NOT use on aluminium surfaces.

DANGER Safety Information: HSR002526

Cleaning Products Subsidiary Hazards Group Standard:

H290 - May be corrosive to metals.

H314 - Causes severe skin burns and eye damage.

H318 - Causes serious eye damage.

H302 - Harmful if swallowed.
