

JUTE MATTING

Landscape Jute Mat is a 100% biodegradable organic fibre staple, constructed into a dense high strength fibre blanket used in the control of soil erosion and the suppression of weed growth. Landscape Jute Mat serves to increase moisture retention in the soil whilst aiding the establishment of long term vegetation stabilisation by protecting the topsoil against erosion by wind and flowing water.

Landscape Jute Matting	
<i>Material</i>	100% Biodegradable Jute Fibre
<i>Standard Size</i>	1.83m x 25M (45.75m ²)
<i>Weight</i>	≥ 800gsm
<i>Thickness</i>	6.5mm +/- 1mm
<i>Roll Weight</i>	37.0KG
<i>Longevity</i>	12-18 Months
