

WHERE DID JANUARY GO EDITION

Well, here we are in February already. We have a couple of new products on board along with some special offers and info on other items in stock. Check them out below.

The PLANTAR PAD is an easy to use Fascia Tissue Strength Training Device

The design places the plantar fascia under some tension while the foot & calf muscles work. It uses the Windlass Mechanism - the toes are extended and the heel is raised causing a tensile pull on the fascia. With correct use as part of a Rehab Plan the exercise strengthens fascia tissue and reduces pain. Don't tell your patients to just use a towel. Sell them a PLANTAR PAD so that they can consistently complete strengthening exercises with a specifically designed, effective, evidence based device.

YOUR COST \$24.50

YOUR SELL \$35-38

GelSmart CUSTOMISABLES

GELSMART CUSTOMISABLES allow you to supply and customise footcare according to your patient.

Increase or decrease the amount of force, depending on the foam insert, for each individual condition. Gradually train the foot to accept more separation by using different durometer inserts or no insert. Loop design for all day wear.
