COVID-19 AND SUPPLY OF GOODS TO PODIATRISTS

UPDATE 14/4/2020

Dear valued customers

As we all continue to work through the current Covid-19 situation DBS are doing our best to source products you need, supply your normal consumables and dispatch orders as quickly as possible. However ongoing shortages of many medical products continues to be the case.

****SCROLL DOWN TO SEE OUR SPECIAL INFECTION CONTROL PACK OFFER!**

These products are especially useful in the current situation, are effective, high quality, well priced and in stock for immediate delivery.

****PRODUCTS AFFECTED****

ALL FACEMASKS, MANY HAND WASHES, MANY HAND SANITISERS, CHLORHEX IN 70% ALCOHOL & ALL CLEANING & DISINFECTING PRODUCTS. WE ARE DOING OUR BEST TO BE ABLE TO SUPPLY OUR REGULAR CUSTOMERS.

We will not be supplying any of the above items in bulk and reserve the right to adjust order quantities based on what we anticipate we can actually get. Unfortunately we will not be able to supply you if you don't regularly order these products. The situation is fluid and we will look at changing this policy if supply chains open up further.

ALL Pods are facing the same issues and we are trying our best to be able to supply something to as many of our regular customers as possible.

DBS ARE ONLY SUPPLYING PODIATRISTS AND ALLIED HEALTH PRACTITIONERS ALREADY ON OUR DATABASE

We are NOT supplying other Allied Health or other medical disciplines. Many products are being diverted to Hospitals or the Government Stockpile. This is why we are restricting sales to our existing purchasers of such products.

***We welcome any new customers not requiring these products and would love to help you with any enquiries you may have. Please click on "Sign Up" then "Apply Now" to register for a login to our website.

INFECTION CONTROL PACKS

**A SIMPLE, COST EFFECTIVE AND CLINICALLY EFFECTIVE PACK OF IC PRODUCTS
IN STOCK AND AVAILABLE FOR IMMEDIATE SUPPLY.**

CLINIDET 5lt

Clinical detergent specially formulated to meet the requirements of AS/NZS 4187 & AS/NZS 4815 for optimal Infection Control. Perfect for manual and hard surface cleaning. Mild alkaline formulation with no irritating or hazardous ingredients.

Can be diluted as per instructions and used in a spray bottle. Labelled bottles with a mist free pump are available or you can use any spray bottles you have.

ABC's Dr Norman Swan from the Coronacast 9/4: "I think there is no question that the safest and simplest thing to use for surfaces is detergent. Detergent gets rid of this virus because it knocks off the fat around the virus and exposes it and the virus dies. So that's the most effective thing."

Please do not use your valuable and expensive Chlorhex/Alcohol products for hard surface cleaning. It is not recommended by the Podiatry Association, it can damage surfaces especially chair upholstery and at present there are limited supplies.

V-WIPES

Disposable Hospital Grade wipes to clean and disinfect in one step. 230 x 300mm 50 per pack. Contains Benzalkonium Chloride 9.63 g/L.

Great for general wiping down - door handles, benches, railings etc.

CLINICLEAN TOWEL ROLL

White embossed 2 ply towel roll
24.5 x 50m roll perforated every 38cm

Use for wiping down surfaces with your cleaning products.

Please do not use your hand towels for wiping and cleaning. They are designed for drying hands, are more expensive and there are limited supplies.

IC PACK SPECIAL OFFER \$45.00 save over 10%

1 x CLINIDET 5lt, 1 x V-WIPES pack of 50, 2 x Cliniclean Towel Rolls

ADD ANY OTHER IC OR CLEANING PRODUCTS YOU REQUIRE TO THE PACK.

OR ADD THIS PACK TO YOUR REGULAR ORDER.

AQIUM HAND SANITISER 375ml and 1lt ARE BACK IN STOCK!

SUPPLIES ARE STILL VERY LIMITED!

PLACE YOUR ORDER AND WE'LL SEND WHAT WE CAN
