COVID-19 AND SUPPLY OF GOODS TO PODIATRISTS

UPDATE JULY 2020

Dear valued customers

As we all continue to work through the current Covid-19 situation DBS are doing our best to source products you need, supply your normal consumables and dispatch orders as quickly as possible. However there are still ongoing shortages of many medical products and deliveries are slower than usual.

****PRODUCTS AFFECTED****

ALL FACEMASKS, MANY HAND WASHES, MANY HAND SANITISERS, CHLORHEX IN 70% ALCOHOL & ALL CLEANING & DISINFECTING PRODUCTS.

STOCK SITUATION JULY 2020

FACEMASKS – good stock of 3 ply earloop masks with more coming

GLOVES – limited stock of some sizes so some order limits. More due in August.

HAND SANITISER – good stock but some order limits in place.

CLEANING & DISINFECTION – reasonable stocks but some order limits in place.

We will not be supplying any of the above items in bulk and reserve the right to adjust order quantities based on what we anticipate we can actually get.

There have been ongoing price rises as all manufacturers are dealing with shortages of raw materials and large increases in freight costs.

We are endeavouring to keep prices as low as possible but have no choice but to pass these on when our suppliers increase prices to us.

ALL Pods are facing the same issues and we are trying our best to be able to supply something to as many customers as possible.

Many products are still being diverted to Hospitals or the Government Stockpile which is why procuring certain items is difficult.

We welcome any new customers and would love to help you with any enquiries you may have. Please click on "Sign Up" then "Apply Now" to register for a login to our website where you can see all our products and prices.
