

## SOLUSHIN SIZE CHART

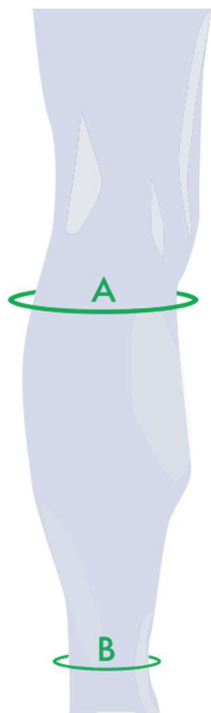

The Solushin is a patented medical device (ARTG #325902) clinically validated to treat medial tibial stress syndrome (commonly known as "shin splints") and to improve your ankle range of motion.

### CHOOSING THE CORRECT SIZE IS IMPORTANT

Measure your A and B circumferences then use this chart to find your size.

If one of your measurements suits a different size to the second measurement,  
**CHOOSE THE LARGER SIZE**

e.g. If your A measurement is 35cm and B measurement 21cm, choose Medium.  
Similarly, if your B measure is 29cm but your A is 34cm, you would choose Large.  
The sleeve isn't made for compression but for comfort and the Velcro straps allow easy adjustment for the best fit - if it sits slightly loose, don't worry.

SIZING		
	A	B
S	30 - 33cm	22 - 24cm
M	34 - 36cm	25 - 27cm
L	37 - 40cm	28 - 30cm
XL	41 - 44cm	31 - 34cm
