

Shuttleless Towel Range

NZWTA

Tested for
Loop Slippage, Shrinkage
& Bursting Strength

Shuttleless is a mid-weight towel range with good core strength and a soft feel. Woven in 530gsm, 100% carded ring-spun cotton, Shuttleless is fast drying and has a nice lofty pile.

Great value for money and is one of our original and most popular ranges, still going strong year after year, wash after wash.

Wash instructions

Our commercial towels are imported compressed into bales for maximum efficiency. They will need to be washed before use to ensure initial shrinkage to build strength and fluff up the towel.

Once dry, shake out and snip off any loose threads. It is perfectly normal to have a few and they will usually show after the hot wash.

First wash of 60°C
Wash dark colours separately

Do not bleach

Do not iron

Tumble dry warm

Available colours
