

Same Trusted Performance 50% Less Dye

V-Wipes™ now offer the same trusted efficacy
with a lighter environmental footprint
— thanks to 50% reduced dye.

Whiteley is making a sustainability focused update to V-Wipes™ by reducing the fabric dye content by 50%. This change has been thoroughly tested to ensure there is no impact on performance, usability, or recognisability. V-Wipes™ will retain their trusted apertured fabric and signature red wave pattern. The update aligns with our commitment to continuous improvement, whilst maintaining performance and supporting more environmentally friendly practices.

Proven to kill a
broad spectrum of
bacteria and viruses
