

ENTRO

BEYOND THE DOOR  
Inspiring office spaces

## OPEN POSSIBILITIES

A workplace is experienced through its details; the surfaces, finishes and touchpoints that shape how people move through a space.

ENTRO goes beyond the door, creating architectural hardware that sits quietly within the broader design language of contemporary office environments. With a unified approach to design, manufacture and finish, ENTRO brings consistency, clarity and refinement to every door and every project.

Designed for premium workplace and commercial settings, our hardware supports the architecture without competing with it, aligning form, function and finish in a way that feels considered, seamless and complete.

Great workplace design does not stop at the door.

It goes beyond it.

## THE DETAILS THAT SHAPE EXPERIENCE

Great workplace design is built on thousands of decisions. While materials, furniture and lighting often attract the attention, it is the details that people experience most frequently that leave the strongest impression.

Door hardware sits at the intersection of design and function. It is one of the first things people touch when entering a space, the last one they encounter when they leave and one of the few design elements they physically interact with throughout the day.

For architects and designers, hardware presents an opportunity to reinforce design intent, create consistency across environments and elevate the user experience without demanding attention.

When thoughtfully specified, hardware becomes more than a functional necessity. It becomes part of the architectural language of the space.

At ENTRO, we believe great hardware should feel effortless. Beautifully integrated, technically resolved and designed to support the way people experience a workplace.

“The door handle  
is the handshake  
of the building.”

- Juhani Pallasmaa, Architect

“The details are not the details,  
they make the design.”

- Charles Eames, Architect

## EVERY TOUCHPOINT TELLS A STORY

### The arrival experience

Before a meeting begins, before a presentation is delivered and before a word is spoken, visitors begin forming opinions about a workplace.

Entrance hardware creates that first physical interaction. The weight of a handle, the quality of a finish and the precision of its detailing all contribute to how a space is perceived.

### Consistency creates confidence

The most successful workplace projects deliver a consistent experience from arrival through to departure.

By coordinating hardware across entrances, meeting rooms, collaborative spaces and amenities, architects can create a subtle but powerful thread that connects the entire environment.

YETI

## YETI AUSTRALIA

A workplace where every detail earns its place and reflects the important values of the YETI brand.

Designed by Chad & Wick, the YETI Australia Headquarters embodies the same values that have made the brand globally recognised for performance, durability and quality.

The workplace balances functionality with experience, creating an environment that feels authentic to the YETI brand while

supporting collaboration, creativity and growth.

ENTRO partnered closely with the project team to deliver a coordinated hardware solution that complemented the architectural vision while meeting the practical demands of a high-performing workplace.

“The way we were able to work with ENTRO was really a highlight.”

- Liana Chadwick, Chad&Wick

### DELOITTE

Creating a workplace that feels as considered as it functions.

Located within Sydney's iconic Quay Quarter Tower, Deloitte's workplace reflects a premium, contemporary environment designed to support collaboration, innovation and client engagement.

Working alongside the project team, ENTRO helped deliver a bespoke hardware package tailored to the scale and sophistication of the fitout.

Custom handles, coordinated finishes and carefully resolved technical details were integrated throughout the project to support both the design vision and functional requirements.

The result is a workplace where every element feels intentional — polished, considered, and unmistakably premium.

## DESIGN FREEDOM WITHOUT COMPLEXITY

We deliver customisation without the complication.

Every workplace is different. That's why ENTRO offers architects and designers the flexibility to create hardware solutions that align with their project vision and their client's brands, rather than forcing projects into standard specifications.

From custom finishes and bespoke detailing through to specialised project requirements, our team works closely with designers to deliver solutions that support both aesthetics and performance.

## COLOURS WITH ENDLESS POSSIBILITIES

Design consistency often comes down to the smallest details.

With access to an extensive colour palette and various finishes, architects and designers can coordinate hardware with joinery, feature elements, workplace branding and architectural finishes to create truly cohesive environments.

Whether matching existing materials or creating a standout design feature, ENTRO's custom colour capability provides the flexibility to bring workplace concepts to life.

## HARDWARE, MADE SIMPLE

Quality hardware. A clear process. No surprises.

Every successful project starts with more than great products. It requires alignment, communication and a process that keeps stakeholders informed from concept to completion.

The ENTRO Way is our structured **10-step Discovery to Delivery Process**, designed to simplify specification, protect design intent and support delivery at every stage.

From initial discovery and specification through to tender, stakeholder management, project delivery and handover, we stay involved to ensure nothing falls through the cracks.

By combining technical expertise with proactive project support, we help architects, designers, builders and developers move faster, reduce risk and deliver better outcomes.

**“We’ve built ENTRO around speed, responsiveness and local expertise because great projects can’t afford delays.”**

- Jordan Smith, ENTRO Managing Director

## DISCOVERY TO DELIVERY

ENTRO’s 10-step Discovery to Delivery Process.

- INTRO DISCOVERY  
We get to know your project.
- ▼ DESIGN INTENT  
We understand your design vision, budget and requirements.
- ▼ STAKEHOLDER ALIGNMENT  
We align the right people and keep everyone informed.
- ▼ PRODUCT SELECTION  
We recommend the right solutions, with samples and finishes for approval.
- ▼ DEEP DISCOVERY  
We confirm every technical detail: scope, design, performance, compliance and integration.
- ▼ SPECIFICATION DEVELOPMENT  
We build a complete, accurate hardware schedule.
- ▼ PROPOSAL SUBMISSION  
We provide a priced proposal and optimise cost without compromising quality.
- ▼ PROJECT COORDINATION  
We support the build with site visits, scope reviews and liaison.
- ▼ DELIVERY & INSTALLATION SUPPORT  
We coordinate supply and support a smooth installation.
- HANDOVER & COMPLETION  
We close out the project and ensure you have everything you need.

## TRUSTED ACROSS AUSTRALIA'S LEADING WORKPLACES

From global brands and corporate headquarters through to education, hospitality and commercial fitouts, ENTRO hardware is specified in projects where design quality and performance matter.

Each project presents its own challenges, architectural vision and user experience requirements. Our role is to ensure the hardware contributes positively to that outcome.

Because great workplaces aren't defined by one design decision. They're shaped by every detail.

## ENGINEERED FOR CONFIDENCE

Designed to perform reliably for years to come.

Generous 25-year warranty periods deliver long-term peace of mind.

We guarantee the performance of our products to give you long-term peace of mind. If any product is found to be defective, we will replace or repair the item free of charge.

### 25-year warranty

Locks & Latches  
(A0100, A0400, A0500 series)

Door Furniture  
(B0100, B2000, B3000 & B7000 series)

Door controls  
(D0450, D0600, D0700, D1200 & D1300 series)

### 10-year warranty

All other ENTRO products

Fire Rated  
AS1530.4

DDA Compliant  
AS1428.1

Rigorous testing and compliance is conducted.

ENTRO hardware complies with all building, life-safety, and accessibility codes and carries the necessary certification for occupancy approvals.

### GECA Certified.

Selected ENTRO Door Furniture and Entrance Handles are independently certified by Good Environmental Choice Australia (GECA), meeting rigorous lifecycle criteria for environmental performance, human health and social responsibility.

## CONTACT US TO START YOUR DESIGN JOURNEY

ENTRO partners with architects, designers and builders to deliver hardware solutions that enhance the way workplaces look, feel and perform.

From specification through to completion, we help bring great design to life.

We're ready when you are.
