

HEAVY DUTY FLOOR SPRINGS

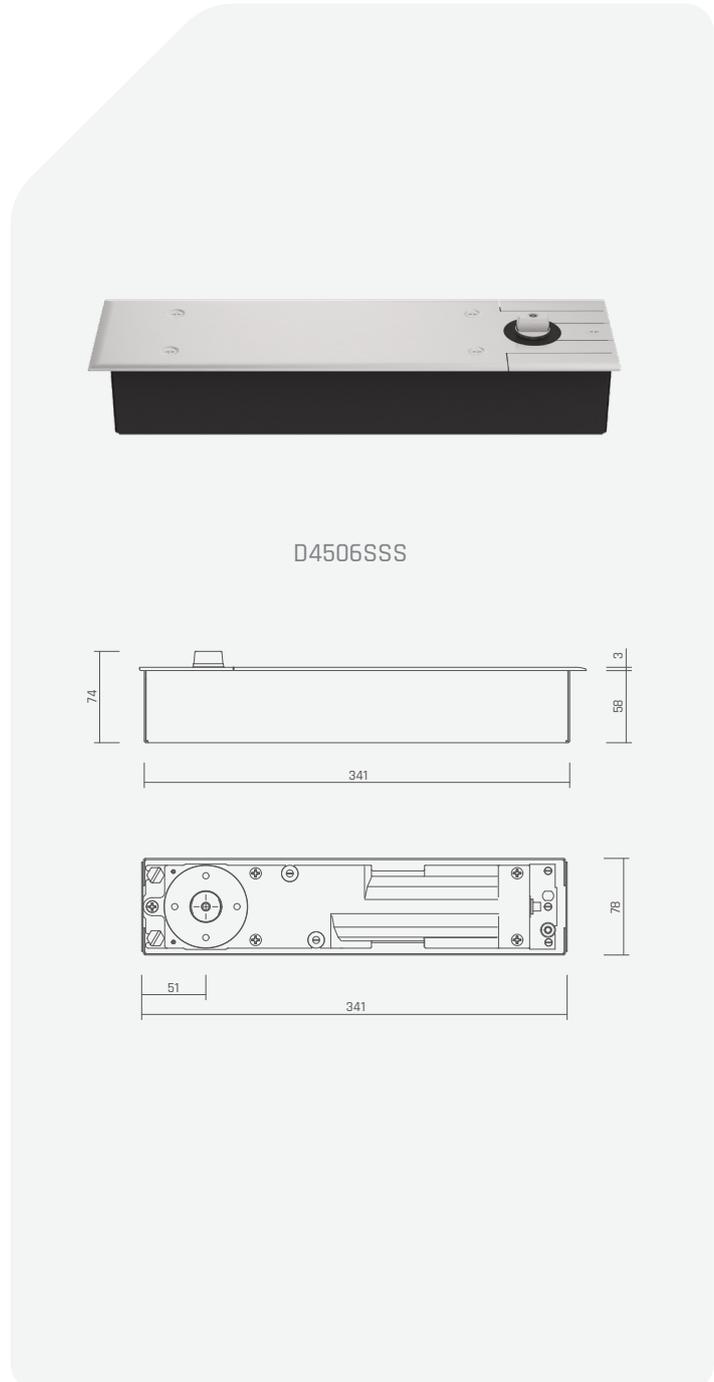

D4500

The D4500 Series floor springs consist of a high-grade cast-iron body, which is power adjustable for sizes 3 to 6, allowing on-site adjustment to suit individual requirements. The securely designed speed-adjustment valves protect the spring mechanism from abuse and adverse weather conditions.

The D4500 Series floor springs are suitable for use with timber, metal and tempered glass doors up to 300kg.
